HEALTH, SAFETY, ENVIRONMENTAL & SECURITY POLICY STATEMENT

The continuous development of our safety culture, which takes steps to prevent incidents, pollution, and reduce energy consumption, is demonstrated by its investment in people, facilities and equipment. We must all work ceaselessly to protect our customers and each other from harm, and our assets from damage, as well as carrying out our activities in a clean and healthy environment.

We will

- Ensure commitment to the establishment and maintenance of safe workplaces and practices
- Manage safety, health and environmental risks in a manner that meets the legal requirements of the countries in which we operate and accepted international criteria
- Hold line management accountable for the implementation of the HSE policy
- Continue to innovate our processes so that their effect on safety, health and environment is reduced
- Conduct operations giving equal importance to safety, health and environment as any of its other critical business activities.
- Be prepared for and deal with any emergency
- Ensure that all personnel have necessary safety awareness through continuous education, training and open dissemination of safety related information
- Audit the HSE performance against the policy, standards and procedures
- Work in compliance with internationally recognized safety standards along with the appropriate local standard, security policy and systematically integrate safeguards and security into management and work practices at all level, so that our company activities are accomplished in a safe and secure manner

The safety of our customers, personnel, assets and business is reliant upon every individual within the Green World Group, without exception
